

B. Summary of Bird Surveys

Table B1: Conservation Status Categories of Bird Species

Code	Category	Brief Description	Source
GC	Global Concern	Habitat loss/ damage in Hong Kong would pose significant threat to global survival.	Fellowes <i>et al.</i> (2002)
RC	Regional Concern	Habitat loss/ damage in Hong Kong would pose significant threat to regional survival.	
LC	Local Concern	Habitat loss/ damage in Hong Kong would pose significant threat to local survival.	
PGC	Potential Global Concern	Large, secure population in Hong Kong is of global significance.	
PRC	Potential Regional Concern	Large, secure population in Hong Kong is of regional significance.	
CR	Critically Endangered	Best available evidence indicates that it meets any of the criteria A to E for Critically Endangered, and it is therefore considered to be facing an extremely high risk of extinction in the wild.	BirdLife International (2017)
EN	Endangered	Best available evidence indicates that it meets any of the criteria A to E for Endangered, and it is therefore considered to be facing a high risk of extinction in the wild.	
VU	Vulnerable	Best available evidence indicates that it meets any of the criteria A to E for Vulnerable, and it is therefore considered to be facing a high risk of extinction in the wild	
NT	Near Threatened	Does not qualify for Critically Endangered or Vulnerable now; but is close to qualifying for or is likely to qualify for a threatened category in the near future.

- Notes:
- (1) Follows the List of Hong Kong Birds (ver. 2020-03-10)
 - (2) Conservation status follows that of Fellowes et al. (2002) and BirdLife International listing (2017). See **Table B1** for the description of the codes. Letters in parentheses indicate that the assessment is on the basis of restrictedness in breeding and for roosting sites rather than in general occurrence. (Fellowes et al. 2002)
 - (3) Refers to the mean number of individuals recorded in each survey in the Survey Area (excluding the WRA)
 - (4) Birds tagged with '#' are Category II protected under terrestrial wildlife state protection. Birds tagged with '##' are Category I protected under terrestrial wildlife state protection
 - (5) 'V' indicates the species is recorded outside regular surveys
 - (6) * Red-billed Starling is considered by Fellowes et al. (2002) to be of Global Concern. Since publication, however, the global population estimate has been revised and the species is not now considered threatened. A listing of Regional Concern (RC), based on the importance of the large roosts present near Deep Bay, is considered to be more appropriate.

Common Species Found in Both the WRA and Survey Area (Excluding the WRA)	
Little Grebe	White-throated Kingfisher
Great Cormorant	Common Kingfisher
Grey Heron	Barn Swallow
Great Egret	White Wagtail
Little Egret	Red-whiskered Bulbul
Eastern Cattle Egret	Light-vented Bulbul
Chinese Pond Heron	Long-tailed Shrike
Yellow Bittern	Oriental Magpie Robin
Black-crowned Night Heron	Stejneger's Stonechat
Crested Goshawk	Chinese Blackbird
Besra	Masked Laughingthrush
Black Kite	Dusky Warbler
White-breasted Waterhen	Yellow-bellied Prinia
Common Moorhen	Plain Prinia
Black-winged Stilt	Red-throated Flycatcher
Common Sandpiper	Swinhoe's White-eye
Whiskered Tern	Black-collared Starling
Spotted Dove	Common Myna
Eurasian Collared Dove	Crested Myna
Asian Koel	Black Drongo
Greater Coucal	Hair-crested Drongo
Indian Cuckoo	Large-billed Crow
Pied Kingfisher	Collared Crow
46	

Species Only Found in the Survey Area (Excluding the WRA)
Peregrine Falcon
Little Ringed Plover
Spotted Redshank
Green Sandpiper
Wood Sandpiper
White-winged Tern
House Swift
Scaly-breasted Munia
Eurasian Tree Sparrow
White-shouldered Starling
Black-naped Oriole
Azure-winged Magpie

- Notes:
- (1) Conservation Status follows that of *Fellows et al. (2002)* and *BirdLife International listing (2017)*. See **Table B1** for the description of the codes. Letters in parentheses indicate that the assessment is on the basis of restrictedness in breeding and for roosting sites rather than in general occurrence. (*Fellows et al. 2002*)
 - (2) Updated species names used in the report include Eurasian Magpie (*Pica serica*) as Oriental Magpie (*Pica pica*), Japanese White-eye (*Zosterops japonica*) as Swinhoe's White-eye (*Zosterops simplex*), Chinese Bulbul (*Pycnonotus sinensis*) as Light-vented Bulbul (*Pycnonotus sinensis*) and Pale Martin (*Riparia diluta*) as Sand Martin (*Riparia riparia*)
 - (3) Species recorded between September and December 2010 only
 - (4) Species recorded between January and October 2024 only
 - ^ Pintail Snipe and Swinhoe's Snipe cannot be distinguished in field, conservation status refers to Swinhoe's Snipe.
 - # Greater Coucal is listed as vulnerable (VU) in China Red Data Book and it is protected terrestrial wildlife state protection (category II).
 - * Red-billed Starling is considered by *Fellows et al (2002)* to be of Global Concern. Since publication, however, the global population estimate has been revised and the species is now not considered globally threatened. A listing of Regional Concern (RC) based on the importance of the large roosts present near Deep Bay, is considered to be more appropriate. (Wetland Restoration Plan, Mott, 2008). Red-billed Starling is now listed as Least Concern by IUCN. (IUCN, 2016)

- Notes:
- (1) Conservation Status follows that of *Fellows et al. (2002)* and *BirdLife International listing (2017)*. See **Table B1** for the description of the codes. Letters in parentheses indicate that the assessment is on the basis of restrictedness in breeding and for roosting sites rather than in general occurrence. (*Fellows et al. 2002*)
 - (2) Updated species names used in the report include Eurasian Magpie (*Pica serica*) as Oriental Magpie (*Pica pica*), Japanese White-eye (*Zosterops japonica*) as Swinhoe's White-eye (*Zosterops simplex*), Chinese Bulbul (*Pycnonotus sinensis*) as Light-vented Bulbul (*Pycnonotus sinensis*) and Pale Martin (*Riparia diluta*) as Sand Martin (*Riparia riparia*)
 - ^ Pintail Snipe and Swinhoe's Snipe cannot be distinguished in field, conservation status refers to Swinhoe's Snipe.
 - V Indicates the species is recorded outside regular surveys.
 - # Greater Coucal is listed as vulnerable (VU) in China Red Data Book and it is protected terrestrial wildlife state protection (category II).

- * Red-billed Starling is considered by Fellows *et al* (2002) to be of Global Concern. Since publication, however, the global population estimate has been revised and the species is now not considered globally threatened. A listing of Regional Concern (RC) based on the importance of the large roosts present near Deep Bay, is considered to be more appropriate. (Wetland Restoration Plan, Mott, 2008). Red-billed Starling is now listed as Least Concern by IUCN. (IUCN, 2016)
