Normal*	151.9§	180.1	12.28	99.5	080	27.0
Station	Hong Kong International Airport	King's Park		Waglan Island		

The minimum pressure recorded at the Hong Kong Observatory was 1009.2 hectopascals at 1530 HKT on 22 November.

The maximum air temperature recorded at the Hong Kong Observatory was 27.8 degrees C at 1531 HKT on 4 November.

The minimum air temperature recorded at the Hong Kong Observatory was 14.6 degrees C at 0645 HKT on 27 November.

The maximum gust peak speed recorded at Waglan Island was 70 kilometres per hour from 020 degrees at 0141 HKT and 0234 HKT on 17 November.

The maximum instantaneous rate of rainfall recorded at King's Park was 133 millimetres per hour at 0817 HKT on 23 November.

Reduced visibility refers to visibility below 8 kilometres when there is no fog, mist, or precipitation.

-The visibility readings at the Hong Kong International Airport are based on hourly observations by professional meteorological observers in 2004 and before, and average readings over the 10-minute period before the clock hour of the visibility meter near the middle of the south runway from 2005 onwards. The change of the data source in 2005 is an improvement of the visibility assessment using instrumented observations following the international trend.

-Before 10 October 2007, the number of hours of reduced visibility at the Hong Kong International Airport in 2005 and thereafter displayed in this web page was based on hourly visibility observations by professional meteorological observers. Since 10 October 2007, the data have been revised using the average visibility readings over the 10- minute period before the clock hour, as recorded by the visibility meter near the middle of the south runway.
