Station	Hong Kong	King's Park			Waglan Island	

International Airport
-----------------------

The minimum pressure recorded at the Hong Kong Observatory was 998.7 hectopascals at 1543 HKT on 13 July.

The maximum air temperature recorded at the Hong Kong Observatory was 33.5 degrees C at 1424 HKT on 13 July.

The minimum air temperature recorded at the Hong Kong Observatory was 24.6 degrees C at 2148 HKT on 17 July, at 0006 HKT on 18 July and at 0820 HKT on 25 July.

The maximum gust peak speed recorded at Waglan Island was 96 kilometres per hour from 170 degrees at 1432 HKT on 1 July.

The maximum instantaneous rate of rainfall recorded at the Hong Kong Observatory was 251 millimetres per hour at 1210 HKT on 23 July.

# Reduced visibility refers to visibility below 8 kilometres when there is no fog, mist, or precipitation.

-The visibility readings at the Hong Kong International Airport are based on hourly observations by professional meteorological observers in 2004 and before, and average readings over the 10-minute period before the clock hour of the visibility meter near the middle of the south runway from 2005 onwards. The change of the data source in 2005 is an improvement of the visibility assessment using instrumented observations following the international trend.

-Before 10 October 2007, the number of hours of reduced visibility at the Hong Kong International Airport in 2005 and thereafter displayed in this web page was based on hourly visibility observations by professional meteorological observers. Since 10 October 2007, the data have been revised using the average visibility readings over the 10- minute period before the clock hour, as recorded by the visibility meter near the middle of the south runway.
