| Normal* | 155.9§ | 193.9 | 14.05 | 123.9 | 080 | 27.4 |
| Station | Hong Kong International Airport | King's Park | | | Waglan Island | |

The minimum pressure recorded at the Hong Kong Observatory was 1003.3 hectopascals at 1508 HKT on 7 October.

The maximum air temperature recorded at the Hong Kong Observatory was 32.0 degrees C at 1441 HKT on 7 October.

The minimum air temperature recorded at the Hong Kong Observatory was 19.4 degrees C at 0653 HKT on 26 October.

The maximum gust peak speed recorded at Waglan Island was 75 kilometres per hour from 090 degrees at 0203 HKT on 13 October.

The maximum instantaneous rate of rainfall recorded at the Hong Kong Observatory was 72 millimetres per hour at 0317 HKT on 10 October.

Reduced visibility refers to visibility below 8 kilometres when there is no fog, mist, or precipitation.

-The visibility readings at the Hong Kong International Airport are based on hourly observations by professional meteorological observers in 2004 and before, and average readings over the 10-minute period before the clock hour of the visibility meter near the middle of the south runway from 2005 onwards. The change of the data source in 2005 is an improvement of the visibility assessment using instrumented observations following the international trend.

-Before 10 October 2007, the number of hours of reduced visibility at the Hong Kong International Airport in 2005 and thereafter displayed in this web page was based on hourly visibility observations by professional meteorological observers. Since 10 October 2007, the data have been revised using the average visibility readings over the 10- minute period before the clock hour, as recorded by the visibility meter near the middle of the south runway.

* 1981 - 2010 Climatological Normal, unless otherwise specified
