Station	Hong Kong International Airport	King's Park			Waglan Island	

The minimum pressure recorded at the Hong Kong Observatory was 1010.2 hectopascals at 1406 HKT on 2 November.

The maximum air temperature recorded at the Hong Kong Observatory was 29.5 degrees C at 1512 HKT on 1 November.

The minimum air temperature recorded at the Hong Kong Observatory was 12.8 degrees C at 0612 HKT on 28 November.

The maximum gust peak speed recorded at Waglan Island was 72 kilometres per hour from 100 degrees at 2121 HKT on 11 November.

The maximum instantaneous rate of rainfall recorded at King's Park was 144 millimetres per hour at 1815 HKT on 24 November.

Reduced visibility refers to visibility below 8 kilometres when there is no fog, mist, or precipitation.

-The visibility readings at the Hong Kong International Airport are based on hourly observations by professional meteorological observers in 2004 and before, and average readings over the 10-minute period before the clock hour of the visibility meter near the middle of the south runway from 2005 onwards. The change of the data source in 2005 is an improvement of the visibility assessment using instrumented observations following the international trend.

-Before 10 October 2007, the number of hours of reduced visibility at the Hong Kong International Airport in 2005 and thereafter displayed in this web page was based on hourly visibility observations by professional meteorological observers. Since 10 October 2007, the data have been revised using the average visibility readings over the 10- minute period before the clock hour, as recorded by the visibility meter near the middle of the south runway.
