			No. of species recorded:	16		

Note:

⁽¹⁾ Conservation status follows that of Fellowes *et al.* (2002) and BirdLife International listing (2017). Letters in parentheses indicate that the assessment is on the basis of restrictedness in breeding and/or roosting sites rather than in general occurrence. (Fellowes *et al.* 2002)

⁽²⁾ Indicates number of surveys recorded within the reporting period.

⁽³⁾ Refers to the mean number of individuals recorded in the reporting period (excluding the WRA).

⁽⁴⁾ Follows HK bird list (dated 2017-09-05).

⁽⁵⁾ Includes observations during other surveys and/or site visits.

⁽⁶⁾ Five regular surveys and one outside survey were conducted

^{*} Red-billed Starling is considered by Fellowes *et al.* (2002) to be of Global Concern. Since publication, however, the global population estimate has been revised and the species is not now considered globally threatened. A listing of Regional Concern (RC) based on the importance of the large roosts present near Deep Bay, is considered to be more appropriate. (Wetland Restoration Plan, Mott, 2008). Red-billed Starling is now listed as Least Concern by IUCN. (IUCN, 2016)

Note:

⁽¹⁾ Conservation status follows that of Fellowes et al. (2002) and BirdLife International listing (2017). Letters in parentheses indicate that the assessment is on the basis of restrictedness in breeding and/or roosting sites rather than in general occurrence. (Fellowes et al. 2002)

⁽²⁾ Follows HK bird list (dated 2017-09-05)

⁽³⁾ Five regular surveys and two outside surveys were conducted

Greater Coucal is listed as vulnerable (VU) in China Red Data Book and it is protected under terrestrial wildlife state protection (category II)

Red-billed Starling is considered by Fellowes et al (2002) to be of Global Concern. Since publication, however, the global population estimate has been revised and the species is not now considered globally threatened. A listing of

Regional Concern (RC) based on the importance of the large roosts present near Deep Bay, is considered to be more appropriate. (Wetland Restoration Plan, Mott, 2008). Red-billed Starling is now listed as Least Concern by IUCN. (IUCN, 2016)
